Professional Summary

Results-driven IT professional with expertise in Mainframe Modernization, Mainframe Application Support & Development, and Enterprise Application Integration & Data Migration. Skilled in replatforming, rehosting, replacing, and refactoring mainframe applications, as well as migrating legacy systems to Micro Focus on Azure to optimize enterprise workflows. Adept at analyzing legacy architectures, estimating modernization efforts, and managing end-to-end migration initiatives. Strong leadership experience in team management, training, and cross-functional coordination to ensure successful project execution. Proven ability to enhance system performance, enable seamless transitions to modernized environments, and align IT solutions with business objectives.

Skill Profile

→ Technical

- **Mainframe:** COBOL, JCL, DB2, IMS DB, IDMS, VSAM, IMS DC, CICS, ADISO, EASYTRIEVE, FOCUS, IBM File Manager, IBM® Debug Tool, Panvalet, ESP, XPEDITER, QMF, IMS Connect, ChangeMan, File-Aid, CA-7 Scheduler, OS/390, Z/OS & IBM MQ
- **Mainframe Modernization:** Microfocus COBOL, JCL, ESCWA, IMS DB, VSAM, SQL Server & MF Data Tools; Azure DevOps, Azure GitHub, Visual Studio (IDE); Micro Focus Enterprise Server (Rocket Enterprise Server)
- **EAI/ETL:** JavaCAPS, Mule ESB, NetBeans IDE, Anypoint Platform, SOAP & REST Webservices, JMS, ActiveMQ, Salesforce Connector, JDBC, JMS, eWay Adapters, QXtend, LDAP, iWay DataMigrator & iWay Adapters
- **Databases:** DB2, Oracle, TERADATA, IMS DB, IDMS, MySQL & SQL Server
- **Operating Systems:** Red Hat Enterprise Linux, IBM AIX, OS/390, Z/OS and Windows NT
- **Languages:** COBOL, Java, C, C++

→ Core Competencies

- Over 6 years of experience in working on Mainframe modernization strategies replatforming, rehosting, replacing, and refactoring
- Remarkable experience in migrating legacy mainframe systems to Micro Focus on Azure
- Over 12 years of onsite, client-facing experience as a Techo-Functional Architect, Business Analyst, and Production support lead.
- Extensive expertise in delivering reliable solutions and analyzing business scenarios for customers in the Retail and Manufacturing domains.
- Experience in legacy system transformation to modern ERP systems, applications, and tools, as well as decommissioning legacy mainframe systems.
- Extensively involved in the design and implementation of EAI/ETL systems using Web Services (SOAP & REST), QXtend, IDOC, SFTP, stored procedures, and other integration methods.

Work Experience

→ 2022 – Present

Senior Mainframe Modernization and Integration Lead
Capgemini Technology Services India Ltd, Mumbai, India

- **Legacy-to-Cloud Transformation Leadership:** Spearheaded the end-to-end migration of IBM z/OS mainframe workloads to Micro Focus Enterprise Server on Microsoft Azure, ensuring seamless replatforming with high performance and maintainability.
- **Application & Database Modernization:** Directed the conversion and modernization of COBOL, CICS, IMS DB, and DB2 applications, including devising IMS-to-SQL Server migration strategies using DB2 stored procedures to replace DLI calls.
- **Integration Re-architecture & Interface Modernization:** Re-engineered mainframe integration points (Connect: Enterprise, Connect: Direct, IBM MQ, EDI, IIDR/CDC, TIBCO RV/SS) with modern solutions (Rocket MFEMSGW, TIBCO EMS, RESTful APIs), aligning with cloud-native and hybrid architectures.
- **Large-Scale Conversion Leadership:** Led a team to convert 1,600+ Easytrieve programs to COBOL and executed lift-and-shift migrations of mission-critical mainframe applications to Azure-hosted Micro Focus Enterprise Server.
- **Strategic Technical Expertise:** Provided architectural direction and hands-on leadership in IBM Migration Utility (IMU), Easytrieve-to-COBOL conversion, and replatforming execution, ensuring secure, scalable, and future-ready solutions.
- **Cross-Functional Collaboration & Execution:** Partnered with infrastructure, development, QA, and cloud platform teams to drive analysis, estimation, development, integration testing, and deployment cycles across modernization programs.
- **Mentoring & Knowledge Enablement:** Trained and guided teams on modernization tools, COBOL/JCL/IMS/DB2 practices, and Micro Focus/Azure environments, building long-term capability and reducing migration risks.

→ 2020 - 2022

Senior Project Lead and SME
Capgemini Technology Services India Ltd, Mumbai, India

- Served as a Senior Project Lead and Subject Matter Expert (SME) in an Agile environment, leading the development and enhancement of corporate finance mainframe applications for a family-owned regional American retail supercenter chain.
- **Business Analysis & Solution Design:** Analyze business requirements and challenges related to business-critical corporate finance mainframe applications, including Accounts Payable, Product Receiving, Inventory Management, Product Costing, Product Billing, Vendor Accounting, Sales Data Collection, Sales Accounting, and General Ledger. Propose innovative, efficient, and scalable solutions to enhance system functionality.
- **Technical Research & Effort Estimation:** Conduct in-depth research and analysis on various technical spikes for finance applications, develop detailed specifications, and provide effort estimates for implementation
- **Agile Development & Stakeholder Collaboration:** Work closely with the Product Owner to define and prioritize user stories, review proposed changes, and coordinate deployments to ensure seamless application enhancements.

→ 2017-2020

Lead – Application/Production Support & Minor Enhancements (Onsite)
Capgemini America Inc, Grand Rapids, MI USA

- **Production Support Leadership:** Led monitoring, maintenance, and support of corporate finance mainframe applications for a family-owned regional American retail supercenter chain, ensuring high availability and performance

- Excellent functional knowledge of finance applications, including Accounts Payable, Product Receiving, Inventory Management, Product Costing, Product Billing, Sales Data Collection, Sales Accounting, General Ledger, Accounts Receivable, Asset Management, and more.
- Experience in building integration solutions between ERP systems (such as SAP, QAD, PeopleSoft), legacy mainframe systems, HR/Payroll systems, and other enterprise software.

Certifications

- MuleSoft Certified Developer – Integration and API Associate
- ITIL Foundation (2011) Certified

Education

➔ 1997 - 2000

Master of Computer Applications (MCA)

Bharathiar University, Coimbatore TN

➔ 1993 - 1996

Bachelor of Science (B.Sc. Physics)

Calicut University, Kozhikode KL

Languages Known

- English
- Malayalam
- Hindi

Address

4D Gold Tower
Vazhakkala Kochi
Kakkanad, KL 682030

- **Mainframe Rehosting & Cloud Migration:** Successfully led rehosting activities, migrating corporate finance applications from on-premises IBM Mainframe to IBM Cloud, optimizing scalability and operational efficiency.
- **Business-Critical Application Management:** Managed and coordinated support activities for key finance applications, including Product Receiving, Inventory Management, Product Costing, Product Billing, Vendor Accounting, Sales Data Collection, Sales Accounting, and General Ledger.
- **Incident & Problem Management:** Provided in-depth incident investigation and service request resolution, conducting root cause analysis and failure mode assessments to address recurring issues and implement corrective actions.
- **Financial Operations & Batch Job Monitoring:** Oversaw month-end and period-end batch schedules, reviewed financial balancing and reconciliation reports, and executed General Ledger posting and balancing reports. Collaborated with financial business teams and IT stakeholders to analyze and resolve any discrepancies.

➔ 2015 - 2017

Techno-Functional Architect – Enterprise Application Integration (EAI) Solutions
Capgemini America Inc, Van Buren Township, MI USA

- **EAI Solution Design & Implementation:** Design, develop, and implement Enterprise Application Integration (EAI) solutions for a leading global automotive parts supplier.
- **Finance System Integration:** Led the design and implementation of EAI solutions for Hyperion (HFM) Planning Solution Implementation, an initiative by the finance division, ensuring seamless integration and data flow.
- **Techno-Functional Architecture & IT Modernization:** Served as a Techno-Functional Architect for key modernization initiatives, including Decentralization of EAI systems into separate product groups; Data center migration from IBM to CTS; Operating system migration from Unix to Linux (RHEL 5.8); Upgrade of EAI tools (Java CAPS) and Oracle Database, ensuring enhanced performance and system stability.
- ➔ 2007 - 2015
- Project Lead – Mainframe Modernization and Enterprise Application Integration**
Capgemini America Inc, Van Buren Township, MI USA (2007 – 2013)
Capgemini Technology Services, Mumbai, India (2013 – 2015)
- **Mainframe Legacy Modernization:** Led mainframe legacy replacement and transformation initiatives for a leading global automotive supplier, ensuring seamless integration of modern technologies.
- **Enterprise Application Integration (EAI) Strategy:** Provided EAI solutions to support strategic business initiatives and legacy transformation efforts, enabling efficient data flow across enterprise systems.
- **Business Process Analysis & Documentation:** Analyse and document automotive business processes and end-to-end data exchanges between legacy mainframe applications, ERP systems (SAP, QAD, PeopleSoft, Fourth Shift), and other enterprise applications.
- **Business Process Integration Planning:** Participate in business strategy meetings to identify required interfaces for new process integration and ensure alignment with modernization goals.
- **Requirements Gathering & Functional Design:** Develop requirement-gathering questionnaires and collaborated with business and application owners to collect detailed requirements; Prepare functional specifications, design documents, source-target data mappings, and test cases for EAI/ETL interfaces.
- **End-to-End Integration Management:** Coordinate development, review, testing, deployment, and post-launch support for new application integrations, ensuring smooth transitions and minimal business disruption.

➔ 2004 - 2007

Lead Developer & Support Analyst

Capgemini Technology Services, Mumbai, India

- **Mainframe Application Development & Enhancement:** Led the maintenance and enhancement of finance applications on the mainframe for critical functions such as Asset Management, Accounts Payable, Accounts Receivable, and General Ledger.
- **Application Support & Maintenance:** Provide production support for mainframe batch and online applications, ensuring stability, performance, and issue resolution for finance operations.
- **Incident Management & Troubleshooting:** Diagnose and resolve application issues, optimize batch jobs, and ensure seamless business operations with minimal downtime.

➔ 2003 - 2004

Application Support Analyst – Mainframe Systems

Syntel India Pvt Ltd, Mumbai, India

- **Mainframe Application Support:** Provide application support for a leading automotive manufacturer, ensuring the stability and efficiency of warehouse and inventory management systems.
- **Batch Job Monitoring & Issue Resolution:** Monitor batch job cycles, analyze system performance, and resolve abends to maintain seamless operations.
- **Minor Enhancements & Development:** Analyze business requirements for minor enhancements, prepare technical specifications, and implement changes; Develop, test, and deploy enhancements to improve system functionality and support evolving business needs.
